

Increase appetite

# DanCrons

Super product for mixing in feed mixes. Used as a sweet and energy-rich raw material in sow and piglet feed to increase feed intake.

Homogeneous product that is delivered in BB and can be used in the hopper.

Can be used for dry and wet food

## ▼ USAGES SOWS

DanCrons are typically used around farrowing. The sows can with advantage be allocated with 600 – 1000 grams per day.

The mixture of unsorted cakes and other products from the food industry that only use vegetable fat.

The product is crushed and stabilized with oatmeal and acid.

## ▼ USAGE PIGLETS

DanCrons are allocated at 5-8% in the first mix.

Then reduce in the subsequent mixtures.

The good taste leads to a greater appetite, greater feed intake and better growth.
