

DanWean®

Debut 3-5 kg

The ultimate pre starter feed. To get the most out of small piglets, it requires that they get a lot of attention. The right temperature, clean water and a good feed are the prerequisite for success.

DanWean® Debut is developed to take care of the needs of even the smallest pigs.

▼ GET SUCCESS WITH WEANING

The right temperature, clean fresh water and a good feed are the prerequisite for success.

Very small piglets require a little extra and therefore DanVIT has developed the feed mixture DanWean® Debut which can take care of even the smallest piglets needs and be a prerequisite for a strong life.

▼ THE BEST RAW MATERIALS

With 35% high quality milk powder and a composition of easily digestible and gentle protein sources, we are approaching a product that can stand alone in the nutrient allocation, even for piglets that should still live on the sows milk.

Over time, many have tried to make mixtures that take care of the needs of the very small piglets, DanVIT has succeeded.

With DanWean® Debut, you do not need another feed for even the smallest piglets.

▼ THE BEST INGREDIENTS

Danwean® Debut are made from ingredients of the highest quality. The careful selection of gentle heat-treated raw materials contributes to the unique composition and balance of fiber, starch and protein. Vitamins, microminerals and amino acids are matched so that growth potential is met with this gentle feed.
