

DanWean®

Primo 4-7 kg

“ Prestarter for early feed introduction - get a trouble-free weaning. DanWean® Primo is a feed mixture that is optimized for piglets from 4-7 kg. Used primarily in the farrowing pen and the first days after weaning.

▼ GET SUCCESS WITH WEANING

The right temperature, clean fresh water and a good feed are the prerequisite for success.

Very small piglets require a little extra and therefore DanVIT has developed the feed mixture DanWean® Primo which can take care of even the smallest piglets needs and be a prerequisite for a strong life.

▼ THE BEST RAW MATERIALS

With 35% high quality milk powder and a composition of easily digestible and gentle protein sources, we are approaching a product that can stand alone in the nutrient allocation, even for early weaned piglets. Over time, many have tried to make mixtures that take care of the needs of the very small piglets, DanVIT has succeeded.

With DanWean® Primo, you are well covered, also for the smallest piglets.

▼ THE BEST INGREDIENTS

Danwean® Primo are made from the best ingredients.

The careful selection of gentle heat-treated raw materials contributes to the unique composition and balance of fiber, starch and protein. Vitamins, microminerals and amino acids are matched so that growth potential is met with this gentle feed. DELIVERY AS BOTH PELLETS AND FLOUR
